PROFESSIONAL EXPERIENCE

Ofniinfo Software Solutions Pvt. Ltd. | React Native Developer **JUNE - 2024 – PRESENT**
Surat , India

- Developed and deployed cross-platform mobile applications using React Native and TypeScript
 - Integrated RESTful APIs and Firebase services (Authentication, Firestore, FCM)
 - Implemented navigation flows using React Navigation and state management with Redux Saga
 - Collaborated with UI/UX designers to deliver responsive & performance-optimized mobile interfaces
 - Worked with native modules and platform-specific code for device features (camera, notifications, permissions)
-

TECHNICAL PROJECTS EXPERIENCE

OPIGO

[PlayStore](#) | [AppStore](#)

Overview:

OpiGo is a Mumbai-based social trading application that allows users to share opinions, create polls, and engage with stock market insights. The platform also offers a Decks feature, where users can subscribe to different investment strategies and receive stock tips from SEBI-registered experts

Key Features:

- Social Trading: Users can share opinions and create polls.
- Decks Subscription: Users can subscribe to different decks (e.g., short-term, long-term) and receive stock tips via WhatsApp & the app.
- Web Support: The Decks feature is also available on the web.
- Over-the-Air Updates: Seamless feature rollouts using Microsoft CodePush.

MEALPE

[PlayStore](#) | [AppStore](#)

Overview:

MealPe is a platform designed to digitize and simplify daily meal orders for corporate offices, universities, and large-scale dining facilities. The solution helps streamline meal planning, reduce food waste, and enhance efficiency in mess and cafeteria management.

Key Features:

- Each student or employee gets a white-label mobile app for their mess or cafeteria.
- Users can use the Meal RSVP feature to check the menu and confirm whether they will attend the next breakfast, lunch, or dinner.
- Once a meal is booked, a QR code is generated for order.
- At the dining facility, an admin panel allows staff to scan the QR code and serve food efficiently.

SELA

Status: App developed but not published on stores

Overview:

SELA is a mobile-first classified marketplace app, similar to OLX, designed to let users buy, sell, and trade products locally. The app offers a smooth and intuitive experience for posting listings, chatting with potential buyers or sellers, and exploring items based on user location.

Key Features:

- Product Listings: Post items with images, price, description, and category.
- Real-time Chat: Seamless in-app messaging between buyers and sellers.
- Location-Based Discovery: Find nearby listings using GPS.
- Applied performance best practices: lazy loading, image caching, and optimized querying.

LANGUAGE

- English: Intermediate
- Hindi: Fluent
- Gujarati: Fluent
